

YOU'RE INVITED TO JOIN CSAMN for our Fall CASB Panel event!

Do you want to **learn more about Cloud Access Security Brokers (CASB)**? Is your company using one or multiple CASB solutions and you want to better understand how to manage the complexity?

You will hear from **Michael Musto III**, SVP of Information Security and Compliance at 3M who will discuss business practices and benefits, **Barry Caplin**, Gartner Leadership Partner of Security and Risk and **Kris Boike**, Sr. Manager of Security Governance, Risk and Business Continuity Program who will further explain the importance of this technology and co-facilitate a panel of **top CASB providers** with experts from **Fortinet, McAfee, Microsoft, NetSkope, Saviynt** and **Symantec** who will share insights and best practices.

This will be a great opportunity to **leverage your time** and **hear from top experts and providers** in this space. There will be plenty of time to **network with other attendees, panelists and speakers** at a social hour immediately following the event.

A **cloud access security broker (CASB)** is a software tool or service that sits between an organization's on-premises infrastructure and a cloud provider's infrastructure. A **CASB acts as a gatekeeper**, allowing the organization to extend the reach of their security policies beyond their own infrastructure.

CASBs deliver functionality through four primary areas of focus: visibility, data security, threat protection and compliance.

CASB systems have become an essential element of any cloud security strategy, helping organizations govern the use of cloud and protect sensitive data in the cloud. Security and risk management leaders concerned about their organizations' cloud use should investigate CASBs.

WHEN

September 26th
1pm to 4pm

LOCATION

Metropolitan State (MN) University
700 East 7th Street, St. Paul, MN
